

RE60 FREE WEIGHT SERIES**RE6005 - INCLINE OLYMPIC BENCH****PRODUCT OVERVIEW**

The RE6005 is a professional-grade incline bench press station designed for high-performance strength training. Built with a durable frame and refined craftsmanship, it is ideal for commercial gyms and intensive workout environments. The unit features two-tier short barbell hooks, accommodating different arm lengths and unracking preferences. The compact hook design enhances racking safety while shortening the lift-off distance for a smoother, more natural motion.

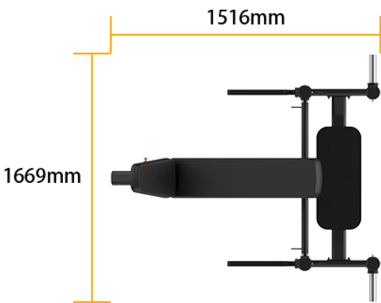

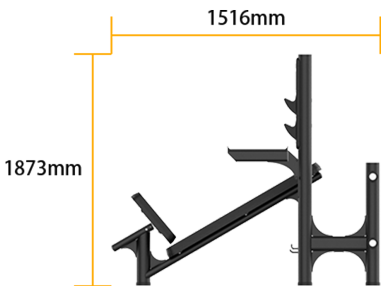

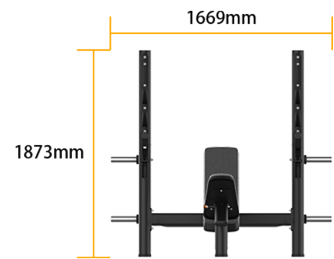

A three-level removable safety catch system is included to provide added protection when training without a spotter. It also accommodates users with varying torso depths and can be quickly stored on integrated bottom hooks to keep the workout area tidy.

The 30° inclined ergonomic back pad is optimized for upper chest activation, offering firm torso support and a precise pressing angle. The 7-position adjustable seat pad accommodates users of different heights, allowing for optimal posture and force output during incline pressing movements.

SPECIFICATIONS & KEY FEATURES

Specifications

Dimension:	1669*1516*1873mm
Net Weight:	105kg
Max Load Capacity:	300kg
Standard Color Scheme:	Gray

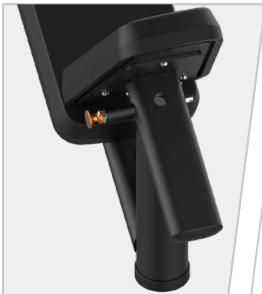

Product Features

30° Ergonomic Incline Back Pad

Tailored for incline press biomechanics, enhancing upper torso stability and chest activation efficiency.

7-Position Adjustable Seat Pad

Supports height-specific customization for ideal pressing alignment and comfort.

Two-Height Barbell Hooks

Accommodate various arm lengths and lift-off habits for greater comfort and efficiency.

Short Barbell Hook Design

Reduces initial lift distance and enhances safety and fluidity during racking.

Three-Level Removable Safety Arms

Provides safety during unsupervised training, adaptable to different user body types, and easily stowed to keep the area tidy.
