

**RE60 FREE WEIGHT SERIES****RE6006 - DECLINE OLYMPIC BENCH****PRODUCT OVERVIEW**

The RE6006 is a professional-grade decline bench press rack built for intensive strength training in commercial gym settings. Constructed with a robust frame and precision craftsmanship, it ensures durability and reliable performance. The rack features two-tier short barbell hooks to accommodate different arm lengths and unracking habits. The compact hook design enhances racking safety and reduces lift-off distance for a smoother, more natural press.

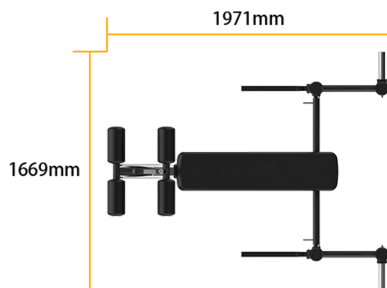

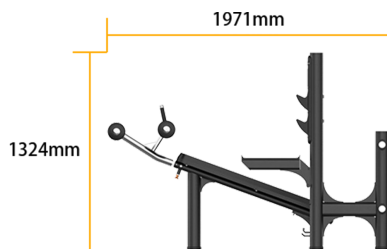

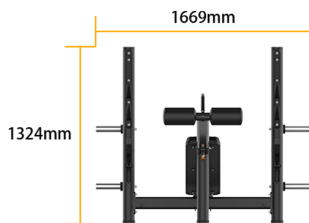

A three-level removable safety catch system offers reliable protection when training without a spotter and adjusts to users of various body types. After use, the safety catches can be conveniently stored on integrated hooks, keeping the training space neat and organized.

The  $-20^{\circ}$  ergonomic back pad is contoured for decline pressing mechanics, reducing shoulder joint stress and enhancing activation of the lower chest. A 6-position adjustable leg hold-down secures the user in place, prevents sliding, and accommodates users of different heights to maintain precise motion paths.

## SPECIFICATIONS & KEY FEATURES

### Specifications

Dimension:	1669*1971*1324mm
Net Weight:	90kg
Max Load Capacity:	300kg
Standard Color Scheme:	Gray

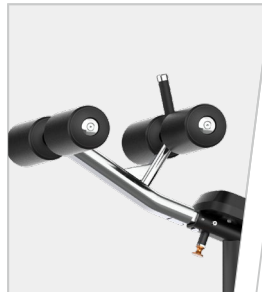

### Product Features

#### -20° Ergonomic Decline Back Pad

Optimized for decline press movement, minimizing shoulder strain while maximizing lower chest activation.

#### 6-Position Adjustable Leg Hold-Down

Prevents body movement and enhances posture stability, suitable for users of varying heights.

#### Two-Height Barbell Hooks

Accommodate various arm lengths and lift-off habits for greater comfort and efficiency.

#### Short Barbell Hook Design

Reduces initial lift distance and enhances safety and fluidity during racking.

#### Three-Level Removable Safety Arms

Provides safety during unsupervised training, adaptable to different user body types, and easily stowed to keep the area tidy.
