Product Features

Multi-Function Training Beyond Ab Work

Equipped with multi-function pulleys and high-strength fiber webbing handles, this machine enables not only kneeling crunches but also lat pulldowns, triceps extensions, face pulls, and more. It's not just an ab trainer - it's your complete body workout companion.

Ultimate Comfort Without Compromising Stability

Embodying our philosophy of premium material selection, all cushions utilize black PU foam with mature one-piece molding technology ensuring permanent shape retention, providing a stable yet comfortable training platform.

High-Strength Cable System for Professional Training

The 5mm diameter cable employs "seven-strand nine-line" high-strength construction, paired with high-flexibility oil-impregnated steel wire. The exterior features imported PA material for superior wear and cold resistance, with a breaking strength of 9000N. This isn't just a cable - it's our commitment to your training security.

Adjustable Leg Pad for All Body Types

The leg stabilization roller features 5-position vertical adjustment, offering effortless customization. Regardless of leg structure, it provides stable fixation without any wobble. This isn't just a design feature - it's our deep understanding of your personalized needs.
