

RE80 SELECTORIZED SERIES

RE8029 - MULTI PRESS

PRODUCT OVERVIEW

The value champion in upper body pressing movements! The ingeniously designed adjustable seat and movement arm system enables horizontal bench press, incline press, and shoulder press variations. One machine delivers comprehensive training for chest, shoulders, and triceps, making this your premium choice for upper body pressing strength.

SPECIFICATIONS & KEY FEATURES

Specifications

Dimension:	1365*1363*1602mm
Total Weight:	245kg
Weight Stack:	105kg
Max Weight Stack:	117.5kg

Product Features

Robust and Durable, Value-Optimized Choice

The main frame utilizes Q235A high-frequency cold-rolled steel, with 40*140mm square tubing and 50*100mm oval tubing working in harmony to ensure machine durability. Surface finishing employs electrostatic powder coating, passing over 800 hours of salt spray and impact testing. The finish is brilliantly aesthetic while the machine remains incredibly durable.

Adjustable Movement Arm and Seat Design, Complete Pressing Freedom

4-position movement arm adjustment combined with 4-position seat adjustment enables seamless transitions between horizontal bench press, incline press, and shoulder press movements. Extensive biomechanical testing has identified optimal training angles, eliminating guesswork in incline adjustments - just sit down, and everything aligns perfectly.

Multi-Angle Handles, Dual Symphony of Protection and Efficiency

Through extensive biomechanical testing, we've discovered optimal handle angles that perfectly match shoulder joint movement patterns. This effectively prevents shoulder injuries during pressing movements while enhancing target muscle engagement, ensuring every press is more focused and nowerful.

Precision Weight Stack Engineering, Professional Training Assurance

Utilizing a high-density cast iron weight stack system with specialized black textured powder coating for premium feel. Special protective coating ensures wear and corrosion resistance, providing lasting durability for professional training. The weight distribution is precisely calibrated, with maximum weight reaching 125kg, allowing you to easily find that "perfect training weight" without compromising.
