

SA SELECTORIZED SERIES

SA004 - SHOULDER PRESS

PRODUCT OVERVIEW

The professional solution for pressing movements and the ultimate choice for deltoid training. Dual-handle design perfectly complements the shoulder joint's complex movement patterns. 5-position seat height adjustment accommodates all body types with ease. The machine's weight distribution is precisely calibrated, allowing every user to easily find their ideal training resistance without compromise.

SPECIFICATIONS & KEY FEATURES

Specifications

Dimension:	1402*1503*1566mm
Total Weight:	232kg
Weight Stack:	100kg
Max Weight Stack:	125kg

| Product Features

Robust and Durable, Value-Optimized Choice

The main frame utilizes Q235A high-frequency cold-rolled steel, with 40*140mm square tubing and 50*100mm oval tubing working in harmony to ensure machine stability. Surface finishing employs electrostatic powder coating, passing over 800 hours of salt spray and impact testing. The finish is brilliantly aesthetic while the machine remains incredibly durable.

Ergonomic Movement Pattern, Protecting Joint Safety

The machine's movement pattern perfectly simulates the shoulder joint's natural pressing trajectory, effectively reducing shoulder joint injury risk. The unique pulley weight system and mechanical leverage design ensure even load distribution, providing stable yet smooth training experience, inspiring confidence in every session.

Dual-Handle Design, Unlocking Comprehensive Shoulder Training

Innovative dual-handle design with standard grip effectively developing overall deltoid strength, while hammer grip position emphasizes anterior deltoid development. Handle surfaces feature special anti-slip material, ensuring stable grip throughout training for superior workout feel.

Precision Weight Stack Engineering, Professional Training Assurance

Utilizing a high-density cast iron weight stack system with specialized black textured powder coating for premium feel. Special protective coating ensures wear and corrosion resistance, providing lasting durability for professional training. The weight distribution is precisely calibrated, with maximum weight reaching 125kg, allowing you to easily find that "perfect training weight" without compromising.
