

SA SELECTORIZED SERIES

SA006 - BICEPS CURL

PRODUCT OVERVIEW

The professional-grade solution for curl movements - your ultimate choice for biceps training. The innovative dual-handle design comprehensively trains both biceps and brachialis muscles. The unique arm pad angle effectively reduces deltoid compensation, focusing force directly on the biceps. 5-position seat adjustment accommodates users of all body types.

SPECIFICATIONS & KEY FEATURES

Specifications

Dimension:	1106*1143*1566mm
Total Weight:	215kg
Weight Stack:	100kg
Max Weight Stack:	125kg

Product Features

Robust and Durable, Value-Optimized Choice

The main frame utilizes Q235A high-frequency cold-rolled steel, with 40*140mm square tubing and 50*100mm oval tubing working in harmony to ensure machine durability. Surface finishing employs electrostatic powder coating, passing over 800 hours of salt spray and impact testing. The finish is brilliantly aesthetic while the machine remains incredibly durable.

Dual-Handle Design, Complete Biceps Coverage

The innovative dual-handle design delivers multi-angle muscle stimulation for comprehensive biceps training. Reverse grip focuses on overall biceps development, while hammer grip precisely targets the brachialis. Handle surfaces feature special anti-slip material, ensuring stable grip throughout training for superior workout feel.

Precise Arm Pad Angle, Eliminating Compensation

The precisely engineered arm pad angle cleverly guides anterior deltoid pre-contraction, effectively preventing compensatory movements. The ergonomic pad design provides stable, comfortable support, allowing users to focus purely on biceps contraction sensation.

Precision Weight Stack Engineering, Professional Training Assurance

Utilizing a high-density cast iron weight stack system with specialized black textured powder coating for premium feel. Special protective coating ensures wear and corrosion resistance, providing lasting durability for professional training. The weight distribution is precisely calibrated, with maximum weight reaching 125kg, allowing you to easily find that "perfect training weight" without compromising.
