

SA SELECTORIZED SERIES**SA016 - SEATED LEG PRESS****PRODUCT OVERVIEW**

The professional-grade solution for lower body training - the ultimate choice for quadriceps development. The oversized non-slip footplate delivers exceptional force transfer efficiency for maximum leg training results. With 8-position adjustable backrest perfectly accommodating different body types and a precision weight system, users of any strength level can find their "perfect training weight."

SPECIFICATIONS & KEY FEATURES

Specifications

Dimension:	1215*1930*1766mm
Total Weight:	267kg
Weight Stack:	100kg
Max Weight Stack:	125kg

Product Features

Robust and Durable, Value-Optimized Choice

The main frame utilizes Q235A high-frequency cold-rolled steel, with 40*140mm square tubing and 50*100mm oval tubing working in harmony to ensure machine durability. Surface finishing employs electrostatic powder coating, passing over 800 hours of salt spray and impact testing. The finish is brilliantly aesthetic while the machine remains incredibly durable.

Oversized Footplate, Stability Guaranteed

The footplate surface features an anti-slip rubber layer providing abundant friction, ensuring optimal force transfer efficiency with every leg press for maximum training effect. The generously sized footplate area allows users to vary foot positioning for precise targeting of different leg muscle regions.

Stable Seating for Precise Training

The backrest offers 8-position adjustment, perfectly accommodating users of all body types. Side-mounted grip handles further enhance training stability, while all cushions utilize premium high-density padding to provide a comfortable, stable support experience.

Precision Weight Stack Engineering, Professional Training Assurance

Utilizing a high-density cast iron weight stack system with specialized black textured powder coating for premium feel. Special protective coating ensures wear and corrosion resistance, providing lasting durability for professional training. The weight distribution is precisely calibrated, with maximum weight reaching 125kg, allowing you to easily find that "perfect training weight" without compromising.
