

RE60 FREE WEIGHT SERIES**RE6010 - BACK EXTENSION****PRODUCT OVERVIEW**

The RE6010 is a professional Roman chair/ Back Extension specifically designed for posterior chain training, targeting the glutes, hamstrings, and lower back. Built with a solid structure and refined craftsmanship, it is ideal for commercial gyms and premium training environments.

The ergonomic pad features 9 adjustable positions, accommodating users of different heights and training preferences. Its contoured design follows the hip joint's natural curve, providing stable and comfortable lower-body support. The extended rubber-coated handles at the front make mounting and dismounting easy and safe.

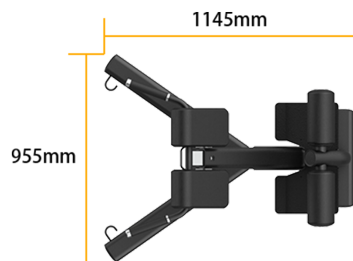

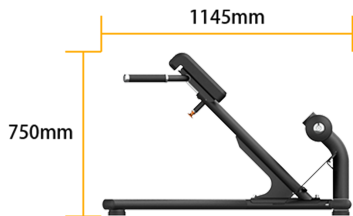

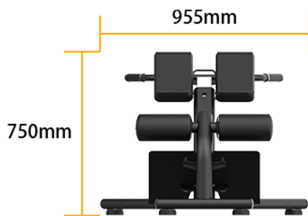

The ankle support rollers offer comfortable cushioning for the lower legs, helping users maintain a stable body position throughout the movement. The wide, anti-slip footplate, precisely angled for optimal joint alignment, enhances lower-body stability and overall training safety.

Additionally, resistance band pegs at the base allow users to add extra end-range resistance, increasing training intensity and improving muscle activation for greater workout efficiency.

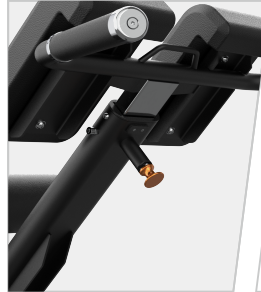

SPECIFICATIONS & KEY FEATURES

Specifications

Dimension:	1145*955*750mm
Net Weight:	42kg

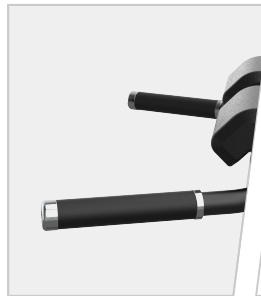

Product Features

Adjustable Leg Support System

The 9-position pad conforms to the hip joint's natural curve, providing stable and comfortable support for users of different heights.

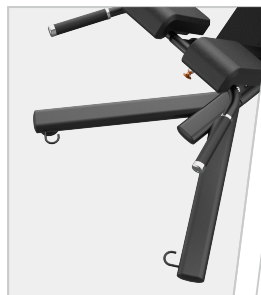

Convenient Safety Handles

Extended rubber-coated handles allow easy mounting and dismounting, ensuring both comfort and safety during use.

Stable Lower-Body Support

Ankle rollers and a non-slip footplate help maintain body stability, ensuring proper posture and safe training execution.

Enhanced Resistance Option

Built-in resistance band pegs add progressive tension at the end range of motion, intensifying muscle engagement and training results.
