

RE60 FREE WEIGHT SERIES**RE6012 - DUMBBELL RACK****PRODUCT OVERVIEW**

The RE6012 is a heavy-duty dumbbell rack designed for efficient storage and organization in commercial gyms and premium training facilities. Built from high-strength carbon steel tubing, it features an anti-rust, electrostatic coating, and wear-resistant finish, ensuring exceptional durability and load-bearing capacity even under frequent use.

The dual-tier structure accommodates 10 pairs of dumbbells with precisely calculated spacing to prevent interference and ensure smooth, stable placement. The well-balanced height distribution allows for convenient organization of dumbbells by weight, optimizing space utilization while maintaining a clean, professional look throughout the training area.

SPECIFICATIONS & KEY FEATURES

Specifications

Dimension:	2266*584*778mm
Net Weight:	80kg

Product Features

Heavy-Duty Structural Design

Constructed with premium carbon steel tubing to deliver superior load capacity and long-term stability under high-frequency use.

Dual-Tier Storage Layout

Scientifically spaced racks for 10 pairs of dumbbells ensure easy access and organized, interference-free storage.

Enhanced Durability and Protection

Finished with anti-rust, electrostatic, and abrasion-resistant coating to extend product lifespan and preserve a clean, professional appearance.
