

**RE60 FREE WEIGHT SERIES****RE6014 - FLAT BENCH**

## PRODUCT OVERVIEW

The RE6014 is a professional flat bench designed for commercial gyms and premium training spaces. Built with a solid structure and refined craftsmanship, it provides exceptional stability and durability. The bench pad uses high-density foam that has been rigorously tested to achieve the perfect balance between firmness and comfort—offering secure support during strength training while maintaining a natural fit and feel.

Equipped with a rubber-coated handle and front transport wheels, the bench can be easily repositioned for efficient space utilization. A wear-resistant, anti-slip pad on the front crossbar protects the frame finish and offers a safe, comfortable foot support for users during assisted training or while mounting and dismounting. With its simple yet practical design, the RE6014 delivers a seamless blend of functionality, safety, and user comfort—an essential piece in any strength training area.

## SPECIFICATIONS & KEY FEATURES

### Specifications

Dimension:	1214*746*423mm
Net Weight:	22kg

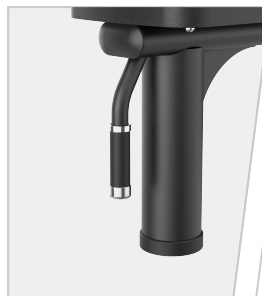

### Product Features

#### Stable & Comfortable Bench Pad

High-density foam tested for optimal firmness, providing both stability and comfort for balanced training performance.

#### Easy Mobility Design

Front rubber-coated handle and transport wheels allow effortless movement and positioning.

#### Anti-Slip Foot Support

Durable non-slip pad on the front crossbar protects the frame and offers secure footing, enhancing safety and user experience.
