

RE60 FREE WEIGHT SERIES**RE6016 - ADJUSTABLE BENCH****PRODUCT OVERVIEW**

The RE6016 is a professional adjustable bench designed for commercial gyms and premium training facilities. Built with a solid structure and refined craftsmanship, it offers durability, versatility, and ease of use. The bench features a rubber-coated front handle and transport wheels for convenient repositioning, allowing seamless integration with various strength training stations.

Its innovative synchronized adjustment system enables the seat pad to automatically align with the back pad's angle, simplifying operation and improving training efficiency. The back pad offers six adjustable positions, ranging from flat to upright, supporting a full range of pressing movements—from flat bench presses to seated shoulder presses—catering to different training goals. The wide, high-resilience back pad provides stable and comfortable torso support, ensuring both safety and ergonomic performance throughout training.

SPECIFICATIONS & KEY FEATURES

Specifications

Dimension:	1366*746*440mm
Net Weight:	44kg

Product Features

Linked Adjustment System

The synchronized mechanism allows the seat pad to automatically follow the back pad angle, enhancing convenience and ease of use.

Multi-Angle Configuration

Six adjustable back pad settings support various exercises, from flat bench press to seated overhead press, accommodating different training goals.

Easy Mobility Design

Rubber-coated handle and transport wheels make it effortless to move and position the bench as needed.
