

RE60 FREE WEIGHT SERIES**RE6024 - FIXED UPRIGHT BENCH****PRODUCT OVERVIEW**

The RE6024 is a seated training bench designed for professional use in commercial gyms and premium training facilities. Built with a solid frame and refined craftsmanship, it combines structural strength with a clean, high-end appearance. The back pad angle is ergonomically engineered to align with the natural movement plane of the shoulder joint, reducing lumbar arching and core strain for enhanced safety and comfort during training.

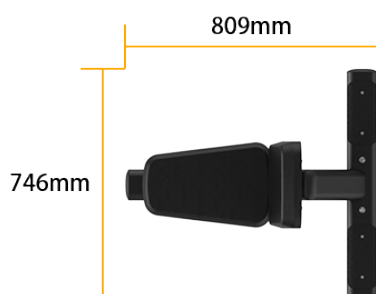

The bench surface is filled with high-density foam that has been repeatedly tested to provide both firm support and comfortable cushioning, ensuring stability throughout various training intensities. A non-slip, wear-resistant pad is applied to the auxiliary crossbar, protecting the coating from abrasion while providing a secure stepping point for training partners—enhancing overall safety and user experience.

SPECIFICATIONS & KEY FEATURES

Specifications

Dimension: 809*746*928mm

Total Weight: 24kg

Product Features

Ergonomic Back Pad Design

The back pad angle follows the shoulder joint's natural movement path, minimizing lumbar arch and reducing core pressure for safer, more natural training posture.

Stable and Comfortable Bench Surface

High-density foam provides balanced support and comfort, ensuring optimal body alignment and stability during exercise.

Non-Slip Foot Support

The horizontal bar features a durable anti-slip pad that protects the frame's finish and offers a safe, stable foothold for spotters or assisting partners.
