

RE60 FREE WEIGHT SERIES**RE6027 - DUMBBELL RACK****PRODUCT OVERVIEW**

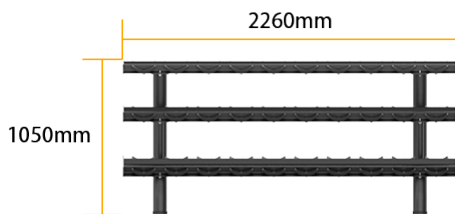

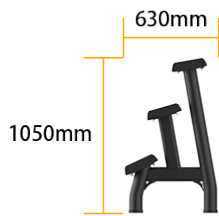

The RE6027 is a heavy-duty dumbbell rack designed for efficient storage and management in commercial gyms and premium training facilities. Constructed from high-strength carbon steel tubing, the rack features anti-rust, electrostatic, and wear-resistant coatings, ensuring exceptional durability and superior load-bearing performance.

The three-tier design accommodates 15 pairs of dumbbells with precisely calculated spacing for smooth access and secure placement, effectively preventing interference between dumbbells. The well-proportioned tier height allows for convenient organization by weight, optimizing space utilization while enhancing the overall cleanliness and professional look of the training area.

SPECIFICATIONS & KEY FEATURES

Specifications

Dimension:	2260*630*1050mm
Total Weight:	115kg

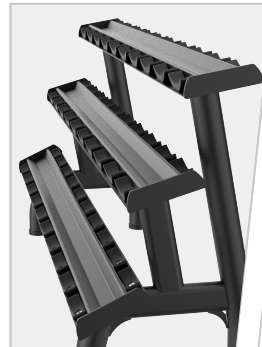

Product Features

Heavy-Duty Structural Design

Built with premium carbon steel tubing to provide superior strength and long-term stability under heavy use.

Three-Tier Storage Layout

Accommodates up to 15 pairs of dumbbells with scientifically spaced tiers for organized, interference-free access.

Enhanced Durability and Protection

Finished with anti-rust, electrostatic, and abrasion-resistant coatings to extend product lifespan and maintain a clean, professional appearance over time.
