

RE60 FREE WEIGHT SERIES**RE6036 - DUMBBELL RACK****PRODUCT OVERVIEW**

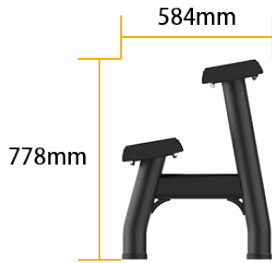

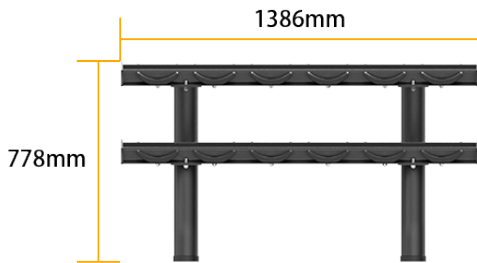

The RE6036 is a heavy-duty dumbbell storage rack designed for efficient organization and management in commercial gyms and premium training spaces. Constructed from high-strength carbon steel tubing and finished with anti-rust, electrostatic, and wear-resistant coating, it delivers exceptional durability and load-bearing performance.

The rack features two tiers accommodating up to 6 pairs of dumbbells, with precisely calculated spacing to prevent interference between dumbbells while ensuring smooth access and stable placement. Its compact, space-saving design allows flexible positioning and efficient use of floor area. The tiered height layout enables convenient organization of different weight categories, optimizing space utilization and enhancing the professional appearance of the training zone.

SPECIFICATIONS & KEY FEATURES

Specifications

Dimension:	1386*584*778mm
Total Weight:	57kg

Product Features

Heavy-Duty Structural Design

Built from premium carbon steel tubing, ensuring strength, stability, and reliability under heavy, frequent use.

Compact and Space-Efficient Layout

Reduced overall length and flexible placement improve floor space utilization and adaptability.

Dual-Tier Storage Structure

Scientifically spaced tiers prevent interference, ensuring smooth handling and organized storage.

Enhanced Durability and Protection

Anti-rust, electrostatic, and abrasion-resistant surface treatment ensures long-lasting performance and aesthetics.
