

RE80 SELECTORIZED SERIES

RE8007 - DIP PRESS

PRODUCT OVERVIEW

The RE8007 Dip Press is a premium selectorized strength trainer designed to develop upper-arm pushing strength, with focused activation of all three heads of the triceps and the lower chest to enhance muscle definition and pressing power. The high-precision pulley system delivers a smooth and consistent resistance profile, ensuring a natural and efficient movement path throughout the exercise.

A standout feature of the RE8007 is its 180° rotating T-shaped handle, which allows training in both narrow and wide grip modes to suit different shoulder widths and training objectives—enabling more precise stimulation of the triceps and lower pectoral fibers. The ergonomic back pad, paired with an infinitely adjustable seat, provides secure upper-body support for users of various heights, minimizing compensation and helping maintain proper form under heavier loads.

SPECIFICATIONS & KEY FEATURES

Specifications

Dimension:	1737*1270*1603mm
Total Weight:	203.5kg
Weight Stack:	80kg
Maximum Weight Stack:	117.5kg
Main Frame Tubing:	PT50×100×2.5
Target Muscle Groups:	Triceps
Max Weight Stack:	Powder-Coated Color 2852-1

Product Features

180° Rotating T-Shaped Handle

Adjustable grip widths to suit different shoulder sizes and training modes for targeted muscle activation.

Smooth and Stable Movement Path

High-precision pulley system ensures a natural, fluid resistance curve for focused and efficient pressing.

Ergonomic Upper-Body Support

Back pad stabilizes the torso to reduce compensation and enhance safety and movement quality.

Infinitely Adjustable Seat

Accommodates users of different heights and helps maintain optimal pressing posture.
