

## SA SELECTORIZED SERIES

## SA021 - DUAL ADJUST PULLEY

## PRODUCT OVERVIEW

The ultimate multi-function training station - capable of training every muscle in your body! Featuring 32-position height-adjustable handles, multi-position single bar grips, and a dual pulley weight system, this machine delivers unprecedented training freedom - train exactly how you want. The central design includes 4 storage positions for easy accessory organization, keeping your training space perfectly ordered.

# SPECIFICATIONS & KEY FEATURES

## Specifications

Dimension:	2070*1220*2300mm
Total Weight:	409kg
Weight Stack:	100kg*2
Max Weight Stack:	125kg*2

## Product Features

### Robust and Durable, Value-Optimized Choice

The main frame utilizes Q235A high-frequency cold-rolled steel, with 40\*140mm square tubing and 50\*100mm oval tubing working in harmony to ensure machine durability. The machine features an elevated design that effectively reduces knee bend during pull-up exercises.

### 32-Position Height Adjustment, Ultimate Training Freedom

Both sides feature 32-position height adjustment systems, accommodating various heights, movements, and trajectories for all training needs - if you can imagine it, you can train it. The adjustment pins feature high-strength spring mechanisms paired with ultra-smooth adjustment rails, making position changes effortlessly smooth.

### Innovative Storage Design, New Heights of Minimalist Aesthetics

Never worry about to place your accessories again - every attachment finds its home. The machine's central area features 4 training attachment storage hooks, easily organizing various handles and accessories, keeping your training space perfectly ordered.

### Precision Weight Stack Engineering, Professional Training Assurance

Utilizing a high-density cast iron weight stack system with specialized black textured powder coating for premium feel. Special protective coating ensures wear and corrosion resistance, providing lasting durability for professional training. The weight distribution is precisely calibrated, with maximum weight reaching 125kg, allowing you to easily find that "perfect training weight" without compromising.
